On August 24, in the year A.D. 79, Pliny the Younger looked up and saw a spectacle the world would never forget. As he later wrote down, "A cloud was ascending, the appearance of which I cannot give you a more exact description of than by likening it to that of a great pine tree, for it shot up to a great height in the form of a very tall trunk, which spread itself out at the top into a sort of branches. It appeared sometimes bright and sometimes dark and spotted, according as it was either more or less impregnated with earth and cinders." Thus opened the sole eyewitness account of the eruption of Mount Vesuvius-one of the most iconic natural disasters in the history of the ancient world. Yet while the account of the eruption is compelling, Pompeii holds a much more intriguing story for historians: a tale of everyday 1st-century life, flash-frozen in time under mountains of sediment. The tragedy left a rich record of daily life as it was experienced by all strata of Roman society; housewives, slaves, merchants, and politicians were stopped in their tracks on that fateful day. Through careful excavations of Pompeii, scholars have revealed the hidden complexities of ancient life, unveiling the everyday activities of commerce, agriculture, politics, and private life otherwise lost to modern eyes. In Pompeii: Daily Life in an Ancient Roman City, gain a tantalizing glimpse into this world, as eminent classicist and Professor Steven L. Tuck resurrects the long-lost lives of aristocrats, merchants, slaves, and other Roman people in this imperial city. The result is an unprecedented view of life as it was lived in this ancient culture-and your chance to discover intriguing details that lay buried for centuries. In 24 enthralling lectures, Professor Tuck unearths these everyday truths to create a full portrait of daily life in the ancient world.

Enlightening view of Pompeii's history

By Divascribe

I have visited the ruins of Pompeii and read a lot about it, but I learned some things I didn't know from this course. The professor takes you through the entire history, from the earlier settlements by the Greeks and Etruscans through the volcanic eruption that destroyed the city. This is history the way it should be presented -- fascinating without hyperbole. The course held my interest all the way through, with good visuals, including photos and graphic recreations of what the city would have looked like from its earliest days until its destruction.
